

US-Morocco Trade and Investment Forum

US-Morocco Trade & Investment Forum to be held in Seattle, WA endeavors to promote investment, trade and partnership opportunities in Morocco particularly in sectors of Aerospace and Aeronautic. The plenary and working sessions will serve as a platform to further explore current potential Industries and growth opportunities in Morocco. This year's edition will provide the opportunity to meet influential decision makers, experts and business leaders during the Networking Session.

Aeronautics in Morocco, a Promising Industry

- Moroccan aerospace industry is becoming among the most competitive emerging manufacturing base in the world, with more than 100 international companies established in less than 10 years employing about 10,000 employees.
- The MidParc Industrial Free Zone, close to Morocco's main airport, offers unique logistical and ready-to-use facilities.
- The launch of the four aeronautic ecosystems in areas of Assembly, Electrical Wiring Interconnection System (EWIS), Maintenance, Repair and Overhaul (MRO) Engineering will contribute to achieve a 35% local integration, attract 100 new actors and reach a turnover of \$1.6 billion.
- Aeronautic Professional Training Institute trains yearly 500 youngsters to supply the labor market with highly qualified employees.
